RAKAN FAYEZ

Cybersecurity | SOC Analyst | Network & Systems Security

Riyadh, Saudi Arabia | +966 55 247 3793 | raljobab@gmail.com | linkedin.com/in/rakan-alshammari | github.com/alreco9

PROFESSIONAL SUMMARY

Cybersecurity graduate specializing in Security Operations Center (SOC) monitoring, threat detection, and log telemetry analysis. Hands-on experience configuring SIEM platforms (Wazuh), threat intelligence integration, endpoint security, and access control. Proficient in log analysis, vulnerability management, network segmentation, and system hardening. Seeking an entry-level SOC Analyst role to apply practical skills in alert triage and incident response.

TECHNICAL SKILLS

Security Operations & SIEM: Wazuh SIEM/XDR (Server, Indexer, Dashboard), Log Analysis (Windows Event IDs, Syslog), SCA, Vulnerability Scanning, Sysmon, MITRE ATT&CK.

Threat Detection & Response: Phishing Analysis, Threat Intelligence Integration (VirusTotal, AbuseIPDB), Basic Incident Triage, IOC Extraction.

Application & AI Security: LLM Guardrails, Prompt Injection Defense, Data Loss Prevention (PII/PHI Regex & Rule Filters).

Networking & Security: VLANs, Port Security, Access Control Lists (ACLs), TCP/IP, Nmap, Wireshark, Cisco Packet Tracer.

Systems & Scripting: Linux (Ubuntu/Debian CLI, Permissions), Windows Administration, User Access Management (IAM), PowerShell, OpenSSH.

PROFESSIONAL EXPERIENCE

Security & Data Integrity Specialist 08/2024 – 07/2026
Sadara Aljazerah Contracting Company

- Oversee subscriber record validation while strictly enforcing data privacy regulations, data confidentiality, and integrity controls.
- Audit access records and system data entries to detect anomalies and prevent unauthorized data modifications.

Technical Support & Access Control Officer 07/2023 – 07/2024
Qassawer Contracting Company

- Managed User Access Management (IAM) permissions, ensuring least-privilege enforcement across operational applications.
- Provided Tier-1 incident troubleshooting, system health monitoring, and security event escalation for technical operations.

IT & Network Infrastructure Trainee 01/2023 – 06/2023
Computer Labs Deployment & Network Setup

- Configured and deployed hardware infrastructure, local networking setups, and system hardening for computer laboratories.
- Implemented baseline security configurations, user access restrictions, and port security across lab workstations.

HANDS-ON CYBERSECURITY PROJECTS

Wazuh SIEM/XDR SOC Home Lab
Wazuh Server & Indexer (Ubuntu) | Windows Telemetry Automation | OpenSearch

- Deployed an on-premises Wazuh SIEM/XDR environment on Ubuntu to execute real-time security log monitoring and telemetry collection.
- Onboarded Windows agents via PowerShell scripts, automating Event Log telemetry and enabling SCA & Vulnerability modules.

SafeBank-LLM: Security Guardrails for AI Chatbots
AI Threat Filtering | DLP Rules | Graduation Project

- Engineered multi-layered security middleware protecting AI interfaces against Prompt Injection and social engineering attacks using DLP regex filters.

Hospital Network Design & Security Lab
Network Segmentation | Port Security | VLANs & ACL Routing

- Designed a multi-floor network isolating clinic staff and IP cameras across dedicated VLANs with enforced Port Security policies and ACLs.

EDUCATION

Bachelor's Degree in Cybersecurity
Irbid National University (09/2022 – 06/2026)

Diploma in Computer Technical Support
Technical College, Saudi Arabia (09/2020 – 06/2022)

CERTIFICATIONS & LANGUAGES

CompTIA Security+ & Linux+
Curriculum completed; preparing for exam

Languages: Arabic (Native), English (Professional)
